what is threading?

Threading is an ancient technique used to remove unwanted hair from the face. Instead of smelly waxes or harsh chemicals, a threading technician rolls twisted antibacterial cotton to remove the entire hair follicle.

Threading leaves no residue, burns or irritation because it is a gentle technique and **100% natural**. A great, healthy alternative to achieve beautiful brows in less than 15 minutes.

Ideal for everyone - for people with sensitive skin, allergies or who use acne creams and medication, threading is fantastic as it does not irritate or damage the skin while removing unwanted hair.

the benefits of threading

100% natural - no waxes or chemicals means less adverse reactions for everyone, especially those with allergies and sensitive skin.

Completely hygienic - Eyebrow Magic only uses the best quality antibacterial cotton thread.

Less painful - no ripping, pulling or scraping is involved at all. Other methods of hair removal actually takes off layers of skin. With threading, only the hair follicle is removed.

Incredibly accurate - such a precise technique enables hairs to be removed one by one or in 'lines'. This creates beautifully shaped eyebrows and picks up even the finest of hairs.

Soft, smooth skin - hairfree skin that lasts up to 3-4 weeks.

Benefits - removing the whole follicle means hair grows back thinner, lighter and slower.
